Portfolio

Career Objective

Computer Science undergraduate with experience in full-stack and backend development using React, Node.js, Django, Firebase, and SQL. Passionate about building scalable web applications, RESTful APIs, and efficient backend systems with strong problem-solving and collaborative development skills.

Education

Ramdeobaba University, Nagpur

B.Tech in Computer Science & Engineering

2023 - 2027

8.19 CGPA

Competitive Programming & Achievements

- Solved **525+** Problems on [LeetCode](#)
- Secured **8th rank** at Hack4Health Hackathon at IIIT Delhi
- Earned **4** badges with 4 star on [HackerRank](#)
- 2 Star on CodeChef with 1496 Rating [Codechef](#)

Experience

ParkBy Technologies Pvt Ltd.

Aug 2025 – Nov 2025

Software Development Intern

- Developed and maintained a scalable parking slot booking platform using React and Django with secure authentication and efficient backend workflows.
- Built RESTful backend services and optimized data handling for booking, user management, and AI-based safety monitoring features.
- Collaborated in an agile development environment, participating in sprint planning, testing, and feature deployment using Jira and Git.
- Ensured robust code quality by debugging strict logic constraints and precisely aligning method signatures (e.g., minimumPrefixLength, specialNodes) to pass automated judge validations and internal test cases.

Projects

PatientKhata | [TypeScript](#), [Firebase](#), [React](#)

[Website](#)

- Built a secure full-stack healthcare platform for managing patient records with Firebase Authentication and role-based access control.
- Architected database structures, rigidly prioritizing local host environments during initial development and testing phases to guarantee data integrity before cloud deployment.
- Implemented protected routes, persistent login sessions, and responsive dashboards for doctors and assistants.

AttendX – Hybrid Automated Attendance System | [YOLOv11](#), [DeepFace](#), [Python](#), [Flask](#), [React](#), [Firebase](#)

[Website](#)

- Designed a hybrid AI-based attendance system supporting both offline (CCTV) and online (Zoom/Google Meet) classrooms.
- Implemented YOLOv11 face detection and DeepFace recognition with randomized multi-checks to ensure accurate, proxy-free attendance.
- Built a cloud dashboard with real-time attendance updates, analytics, <75% alerts, student notifications, and teacher override support.

KissanKhata | [React](#), [TypeScript](#), [Firebase](#), [Node.js](#)

[Website](#)

- Developed a scalable role-based management platform for handling products, sales, collections, and distributor operations.
- Implemented authentication, protected APIs, persistent sessions, and dynamic dashboards for distributors, staff, accountants, and managers.
- Integrated Firebase Firestore for real-time data synchronization, optimized queries, and efficient backend data management.

House Price Prediction | [Flask](#), [Pandas](#), [Linear Regression](#), [HTML](#), [CSS](#), [JS](#)

[Website](#)

- Built a full-stack web application for real estate price prediction integrating a machine learning model with Flask.

Skills

Programming Languages: Java, Python, JavaScript, SQL, C, OOPs

Backend Development: Node.js, Express.js, Django, SpringBoot REST APIs, Firebase, Authentication

Frontend Development: React.js, TypeScript, TailwindCSS, HTML, CSS

Databases & Cloud: Firebase Firestore, SQL, Cloud Functions, Database Design

Core Concepts: Data Structures & Algorithms, Multithreading, Concurrency, System Design, Operating Systems, Computer Networks

Developer Tools: Git, GitHub, Postman, VS Code, Jira

Certificates & Leadership

- Joint Secretary at NSS RBU, managing a unit of 250 students.
- Deloitte Data Analyst Job Simulation (December 2025)
- Java Basic – HackerRank (June 2025)
- SQL Intermediate – HackerRank (June 2025)
